"...[Momen's] art engages us because of the constant tension we find between the cool, rationally conceived compositions and the dynamic use of color and texture that enliven familiar shapes with the passion of a warm and humane spirit. Momen is ever cognizant of the viewer as a sentient being. His emphasis on balance, control, composition, and craft is counterbalanced by the spontaneity and freshness of scintillating color and texture."

"Just as Paul Cezanne maintained 'art is a harmony parallel to nature,' so Momen has created his own universe of innovation - a world that continues to be amazingly resilient and invitingly familiar."

Herman du Toit, Ph.D.
Brigham Young University Museum of Art,
Provo, Utah

The Tech Museum of Innovation catalog,
San Jose, CA, May - September, 2005

"Safe Landing"
